

The true secret

The true secret of

TSSRK Rao's smiles,

Lies in his colourful

Pentagon rides!

Arranged his names on the vertices,

Rao at the centre for the sway,

Then joined each pair so neatly,

and coloured them in a clever way!

Taduri Rao, Srinivasa Krishna, Siva Rama,

all in bright yellow so well cast,

Srinivasa Rao, Siva Taduri, Rama Krishna

in beautiful blue ever so vast!

Siva Rao, Rama Srinivasa, Krishna Taduri,

in energetic red set so well,

Rama Rao, Krishna Siva, TaduriSrinivasa,

each in its own lovely orange shell!

Krishna Rao, Taduri Rama, Srinivasa Siva,

in symbolic of creativity ever so green,

His agility to move from one bogey to another,

hard to believe and only to be seen!

He caught a glimpse of knowledge and wisdom,

of analyst from MIT, Ashoke Kumar Roy,

Who to channelize his ability assigned him,

The job as an L-1-predual spy!

The moment he was through with that,
jumped to duals of order two, three and four,
Pondered on proximity,
till he drew the line for no more!

His useful interactive and collaboration visits,
particularly to USA and Spain,
Brought many good papers with people like,
Phelps, Bor-Luh Lin, Martin and Jamison!

When extreme points were in control,
looked closely inside the intersecting ball,
Quietly organized conferences and workshops,
but edited the proceedings loudly to tell all!

And Godefroy, Molnar, Schlumprecht, Yost,
Roy, Sinha, Sunder et al from far and near,
To tell you about his work and related matters,
in their own words are all here!

September 23, 2016

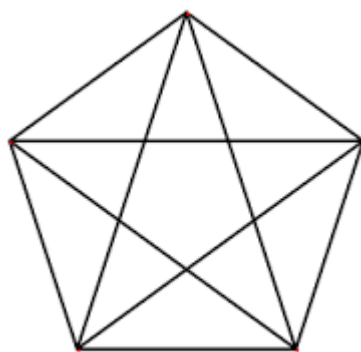

Ajit Iqbal Singh

Join each vertex to Rao at the centre

Krishna

Rama

Siva

Taduri

Srinivasa

Now colour 15 edges as in the poem.
