

Comparison of point processes and applications to geometric networks

YOGESHWARAN D.

Technion, Haifa.

joint work with **BARTEK BLASZCZYSZYN**

Ecole Normale Supérieure - INRIA, Paris.

Outline of the talk

- Percolation

Outline of the talk

- Percolation
- Percolation and Clustering of point processes

Outline of the talk

- Percolation
- Percolation and Clustering of point processes
- Directionally Convex Ordering of point processes

Outline of the talk

- Percolation
- Percolation and Clustering of point processes
- Directionally Convex Ordering of point processes
- DCX ordering \Rightarrow clustering

Outline of the talk

- Percolation
- Percolation and Clustering of point processes
- Directionally Convex Ordering of point processes
- DCX ordering \Rightarrow clustering
- Examples of *dcx* ordered point processes

Outline of the talk

- Percolation
- Percolation and Clustering of point processes
- Directionally Convex Ordering of point processes
- DCX ordering \Rightarrow clustering
- Examples of *dcx* ordered point processes
- Non-trivial phase transition in sub-Poisson point processes

Outline of the talk

- Percolation
- Percolation and Clustering of point processes
- Directionally Convex Ordering of point processes
- DCX ordering \Rightarrow clustering
- Examples of *dcx* ordered point processes
- Non-trivial phase transition in sub-Poisson point processes
- Comparison of critical radii for percolation
